RE: Ace Technology Partners Brings HPC Forensic Solutions to Cyber Crime Conference

CHICAGO---Ace Technology Partners will be bringing its leading-edge custom forensic workstations to the U.S. Cyber Crime Conference in Washington, D.C. The conference runs from April 27-April 30.

Ace Technology Partners is a 31-year-old ISO9001:2008 Certified Specialty Technology firm; a custom systems integrator specializing in forensic analysis and password cracking systems. They will be displaying their exclusive Raptor 7 portable workstation/servers (for field investigations) from booth #309. Ace Technology Partners holds multiple federal, state and educational contracts and works closely with a spectrum of law enforcement agencies.

To keep up with the global cyber threat, the conference is expanding its objectives and direction to empower the civilian, defense, and government digital forensics communities (legal, IT, and criminal investigation) to team together in the continuing campaign against cyber crime.

The conference is the only event of its kind that provides both hands-on digital forensics training and an interactive forum for cyber professionals to network. All aspects of computer crime will be covered, including intrusion investigations, cyber crime law, digital forensics, information assurance, along with research and development, and digital forensic tool testing.

John Samborski, CEO of Ace Technology Partners, said, "We are looking forward to demonstrating both the practical aspects and sheer power of our portable workstations to the law enforcement community. This is an important conference and we are looking forward to building on the law enforcement expertise that we currently have."

Acknowledged as the best custom technology manufacturer and reseller, Ace Technology Partners is a Woman-Owned Small Business operating in both the public sector and commercial sector. Its channel partners include Intel, Supermicro, NVIDIA, Mellanox and Samsung among others. The company has been an industry leader since 1983. In addition to some of the finest academic institutions in the U.S., long-term clients include the U.S. Department of Energy and the U.S. Department of Defense. Its principal, recognized industry expert John Samborski, is an alumnus of Intel's prestigious board of advisors. In addition to its Greater Chicago headquarters, Ace Technology Partners has locations in New Jersey, Pennsylvania and Colorado. To contact Ace Technology Partners, call 1-877-223-2667 or 1-847-952-6900 or visit <http://www.acetechpartners.com>.
