RE: Ace Technology Partners Brings in NETCENTS 2 Orders

CHICAGO---Ace Technology Partners, one of the leading custom computer builders and resellers in the U.S., is realizing the results of its hard won NETCENTS 2 award. Initial orders—from Alaska to Alabama-- include server components, laser printers, software licenses, and technology supplies.

The company's CEO John Samborski said, "We went through an unusually long vetting process to receive the contract—completely understandable considering the critical role that some of this equipment will play in the U.S. Defense Department. Ace Technology Partners received the contract because we were able to demonstrate product and service quality, expertise, depth of industry experience, procurement experience, financial stability, and overall value."

Technology products that Ace Technology Partners is authorized to sell through NETCENTS 2 include networking equipment, servers and storage, peripherals, multimedia, software, and identity management/biometric hardware and associated software.

"We are very pleased to see that the orders are coming in so quickly," Samborski said. "The hard part was winning the contract; the easy part is processing orders and wowing clients with our products and service. We have been working with the federal government for 3 decades so we have the fulfillment process down to a science."

The USAF's NETCENTS 2 (Network Centric Solutions 2) contract is a collection of acquisitions that replaced the original NETCENTS initiative with 7 separate contracts. The purpose of NETCENTS 2 is to provide the USAF, Department of Defense and other federal agencies with a vetted source for standardized networking equipment, supplies and associated services. NETCENTS 2 contracts are the USAF's main source of IT products, services and solutions. The total value of NETCENTS II, which spans 7 years, is more than \$24 billion.

Acknowledged as the best custom technology manufacturer and reseller, Ace Technology Partners is a Woman-Owned Small Business operating in both the public sector and commercial sector. Its channel partners include Intel, Supermicro, NVIDIA, Mellanox and Samsung among others. The company has been an industry leader since 1983. In addition to some of the finest academic institutions in the U.S., long-term clients include the U.S. Department of Energy and the U.S. Department of Defense. Its principal, recognized industry expert John Samborski, is an alumnus of Intel's prestigious board of advisors. In addition to its Greater Chicago headquarters, Ace Technology Partners has locations in New Jersey, Pennsylvania and Colorado.
