RE: Ace Computers Expands Internationally with Olidata Partnership

CHICAGO---Ace Computers just announced that it has partnered with Olidata, Italy to bring the latest, most innovative custom computer products to clients of both companies. The two companies produce products that parallel each other, but are different enough to create an exchange of significant value.

John Samborski, CEO of Ace Computers, said, "We lead the custom computer market here and Olidata has a similar position in Italy. Together we will be able to develop and build products that would be difficult for either of us to produce alone. This is a classic example of the whole being greater than the sum of its parts."

Olidata SpA, headquartered in Cesena, Italy, is a leading international supplier of IT products and services for the public and private sectors. They sell and support technology products that include desktops, laptops and servers; and solutions for virtualization, security devices, network infrastructure, Cloud computing and office automation. In addition to Ace Computers, Olidata is partnered with AMD, Intel, Lexmark, Microsoft and Xerox. Olidata is listed on the Milan Stock Exchange.

"We are confident that this will prove to be an extremely beneficial partnership for both companies," Samborski said. "Olidata was very excited to initiate the relationship with Ace Computers to jointly pursue the European and Italian markets for desktops, and leverage our relationship with key suppliers in Asia."

Acknowledged as the best custom technology manufacturer, Ace Computers is a Woman-Owned Small Business custom technology systems manufacturer and reseller for the public sector as well as the commercial sector. Their channel partners include Intel, Supermicro, NVIDIA, Mellanox and Samsung among others. It has been an industry leader since 1983. In addition to some of the finest academic institutions in the U.S., long-term clients include the U.S. Department of Energy and the U.S. Department of Defense. Ace Computers builds custom technology with the same components that top manufacturers use without the premium price. Its principal, recognized industry expert John Samborski, is an alumnus of Intel's prestigious board of advisors. In addition to its Greater Chicago headquarters, Ace Computers has locations in New Jersey, Pennsylvania and Colorado. To contact Ace Computers, call 1-877-223-2667 or 1-847-952-6900 or visit <http://www.acecomputers.com/TopProducts.asp>
