

# Ace Computers Named Leading HPC Technology Builder for 15th Year

*This is the 15th year that Ace Computers has been included among the leading HPC technology solution providers in North America.*

**The fact that we have outlasted the majority of our early competitors and have been a stable presence through the ups and downs of the industry has put us in a leadership position.”**— Ace Computers CEO John Samborski

CHICAGO, UNITED STATES, July 5, 2018 -- Ace Computers just announced that it has moved up four places to 252 in this year’s CRN Solution Provider 500 list. This is the 15th year the company has been included among the leading HPC technology solution providers in North America.

Ace Computers CEO John Samborski said, “Since 1983 we have been designing, developing, building and supporting HPC technology solutions for many of the world’s leading enterprises and research institutions. The fact that we have outlasted the majority of our early competitors and have been a stable presence through the ups and downs of the industry has put us in a leadership position.”

CRN is a property of The Channel Company. The Solution Provider 500 is CRN’s annual ranking of the largest technology integrators, solution providers and IT consultants in North America by revenue. The list serves as the industry standard and is, in effect, a qualifier for doing business in the technology community.

Bob Skelley, CEO of The Channel Company said, “CRN’s Solution Provider 500 list spotlights the North American IT channel partner organizations that have earned the highest revenue over the past year, providing a valuable resource to vendors looking for top solution providers to partner with. The companies on this year’s list represent an incredible, combined revenue of \$320 billion, a sum that attests to their success in staying ahead of rapidly changing market demands. We extend our sincerest congratulations to each of these top-performing solution providers and look forward to their future pursuits and successes.”

With several highly prestigious government contracts, an outstanding portfolio of private sector clients and final preparations for a state-of-the-art ecommerce site underway, Ace Computers and its affiliate Ace Technology Partners continue to expand rapidly.

Founded in 1983, Ace Computers is one of the most established and respected custom technology builders in the world. The company is a Woman-Owned Small Business manufacturer and reseller for the public sector as well as the commercial sector with a stellar record of outstanding customer service, engineering expertise and on-time delivery. Ace Computers is a multi-year CES Award winner and HPCwire Readers’ Choice Award finalist. In addition to some of the finest academic institutions in the U.S., long-term clients include the U.S. Department of Energy and the U.S. Department of Defense. Headquartered in Greater Chicago, additional locations include New York, New Jersey, Florida, Virginia, Nevada, Arizona and Colorado.
