ACE COMPUTERS + TROSSEN ROBOTICS

A New Standard for Machine Learning and Robotics

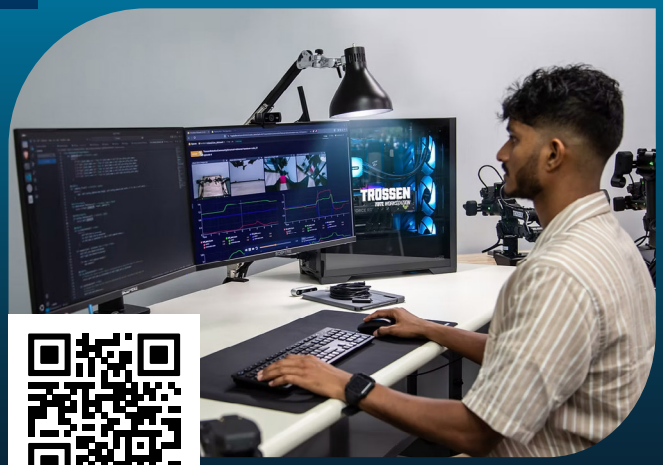

Ace Computers and Trossen Robotics have partnered to deliver the TOTL Workstation, a Linux-native, high-performance system engineered for robotic machine learning, simulation, and long-term reliability.

This partnership brings together Ace's precision-built computing platforms with Trossen's robotics expertise to support researchers, developers, and AI innovators.

Built for the Future

The TOTL Workstation is a research-grade platform purpose-built for machine learning and robotics.

Each system features Linux-native architecture, preloaded AI tools, and enterprise-grade components optimized for long-term deployment in demanding environments.

What Makes TOTL Unique?

- Linux-native OS for open-source ML frameworks and robotics toolkits
- Preconfigured AI stack for development workflows
- Enterprise-grade hardware tuned for simulation, inference, and edge deployment
- Thermal optimization and rugged build quality
- Affordable performance without the enterprise price tag

TROSSEN ROBOTICS & ACE COMPUTERS:

What This Partnership Means

Ace Computers and Trossen Robotics combine computational power and robotic intelligence in one purpose-built workstation.

By pairing Ace's hardware expertise with Trossen's robotics and AI knowledge, the TOTL Workstation gives teams a reliable platform for machine learning, simulation, and robotic development.

TOTL Workstation

Each TOTL Workstation is assembled, tested, and shipped by Ace Computers with careful attention to quality, performance, and reliability.

SPECS

- Intel® Core™ Ultra 9 285K
- NVIDIA® RTX™ 5090 32GB
- 64GB DDR5 5600MHz RAM
- 2TB GEN5 M.2 SSD
- 1200W PSU

TRUSTED PARTNERS

- Google DeepMind
- Stanford
- UC Berkeley

KEY FEATURES

- 360mm AIO CPU Cooler
- 7 Ultra-Quiet Chassis Fans
- Preloaded Ubuntu 24.04 LTS with ML Libraries (PyTorch, JAX, Isaac Gym, ROS, Hugging Face LeRobot)
- Lifetime Product Support + 3-Year Warranty

About Trossen Robotics

Trossen Robotics develops robotic hardware, AI integration tools, and educational platforms for developers and institutions working in autonomous systems.

About Ace Computers

Ace Computers is a U.S.-based technology solutions provider that has built high-quality computer products, supplies, and services since 1983.
